### **DETAILED ACTION**

#### ***Continued Examination Under 37 CFR 1.114***

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 18-January -2006 has been entered.

2. The amendment filed on 18-January -2006 has been received and entered. Claims 1-5, 13-24, and 32-49 have been cancelled. Therefore, claims 6-12, and 25-31 are now pending

### **DETAILED ACTION**

#### ***Double Patenting***

3. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

4. Claims 1, and 25 are provisionally rejected under the judicially created doctrine of double patenting over claims 1, 16, and 32 of copending application Serial No. 10/960,741. This is a *provisional* double patenting rejection since the conflicting claims have not in fact been patented.

For example, claim 1 of the instant application directed to “database of specification”... “defining for each product class a schema”... “providing an interface”...and “in exchange for remuneration” is similar and perhaps arguably broader to those same steps recited in claim 1 of co-pending application 10/960,741.

The subject matter claimed in the instant application is fully disclosed in the referenced copending application and would be covered by any patent granted on that copending application since the referenced copending application and the instant application are claiming common subject matter.

#### ***Claim Rejections - 35 USC § 101***

5. 35 U.S.C. 101 reads as follows:

Art Unit: 2165

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

6. Claim 25 is rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter.

Claim 25 is not limited to tangible embodiments. It recite the limitaion “a system for enabling an entity” in view of Applicant’s disclosure, specification page 6, lines 23-24 does not define what the entity is except merely a hosting entity which can be a person or a company not necessarily a computer entity or host computer server or system and does not actually allow for any functionality to be realized. The recitation of “for” is intended use and does not cause any functionality to occur in the computer since it lacks combination with hardware to realize the functionality.

To overcome this type of 101 rejection the claims need to be amended to include interrelation between the software instructions and the hardware (i.e. computer system serving or providing or performing the actually functionality). A more firm and positive recitation is required.

***Claim Rejections - 35 USC § 112***

7. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

8. Claims 1, and 25 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

9. Applicant's language of "enabling" a computer to do something -in claim 25- is not prohibiting and does not cause any functionality to occur in the computer and thus failing to particularly point out and distinctly claim their invention (it's unclear what Applicant's intended metes and bounds of the claim are, since the claim appears to cover anything and everything that does not prohibit actions from occurring).

10. The term "in a form useful in combination" in claims 1, and 25 is a relative term, which renders the claim indefinite. The term "useful form" is not defined by the claim, the specification does not provide a standard for ascertaining the requisite degree, and one of ordinary skill in the art would not be reasonably apprised of the scope of the invention. It is not specified what that form is defined as, leaving it wide open to all interpretations.

11. Claim 25, line 19 provides for the use of "authoring tool for use outside of the database", but, since the claim does not set forth any steps involved in the method/process, it is unclear what method/process applicant is intending to encompass. A claim is indefinite where it merely recites a use without any active, positive steps delimiting how this use is actually practiced.

***Allowable Subject Matter***

12. Claims 6-12, and 25-31 would be allowable if rewritten or amended to overcome the rejection(s) under Double Patenting, 35 U.S.C. 101, and 35 U.S.C. 112, 2nd paragraph, set forth in this Office action.

***Conclusion***
